

## ***WingMan® Cordless RumblePad™***

**2.4GHz Cordless • Cordless • Dual Analog Sticks • PC • USB • Vibration Feedback**

Enjoy complete freedom of movement during gaming—and still feel all the action with two vibration feedback motors. This is Logitech's premium cordless gamepad for gamers who demand convenience, performance, and an immersive experience.

Feel the action wherever you play—with no cords and no hassles. Logitech 2.4 GHz radio frequency technology, similar to that found in today's best cordless phones, gives you the freedom to twist, turn, and move around without being tethered to your computer. Plus it delivers realistic vibration feedback effects and all the control options you could possibly want, adding up to an unbeatable gaming experience.

- Have complete freedom of movement during gaming with cordless technology.
- Feel every explosion, collision, and recoil with two independent vibration feedback motors.
- Get all the control you need: dual analog mini-sticks, eight-way D-pad, 11 programmable buttons, and a slide throttle.
- Play in the same room with up to seven friends with no radio interference.
- Start playing right away with pre-configured game profiles for hundreds of popular PC games.

### ***Feel the Action Wherever You Play***

- Have complete freedom of movement during gaming with cordless technology  
Logitech Cordless Freedom 2.4GHz technology delivers top gaming performance plus a 20-foot range. There is no lag (latency). You get the full performance of corded controllers, without the hassle of a cord.
- Feel every explosion, collision, and recoil with two independent vibration feedback motors  
Tactile feedback makes just about every game better. And this is the first cordless gamepad to deliver state-of-the-art vibration feedback. Sophisticated dual motor technology provides maximum vibration feedback. You aren't getting the full experience that the game designers intended, unless you are feeling the vibration effects. Wring all the excitement out of your games.
- Get all the control you need: dual analog mini-sticks, eight-way D-pad, 11 programmable buttons, and a slide throttle  
This super-comfortable gamepad has all the control features gamers demand.

And they are all arranged for fast and efficient gameplay. The analog sticks are ultra-accurate and responsive for precise 360-degree movement. The throttle is always within easy reach. The buttons are large and sure. You will be in complete control.

- Play in the same room with up to seven friends with no radio interference  
You can connect up to 8 gamepads to a single PC. It's easy to do and the performance remains excellent.
- 50+ hours of game play with 4 AA batteries (included)
- One-year warranty

### ***Logitech WingMan Profiler software for PC***

- Customize button and force feedback functionality  
Every game is different, and so is every gamer. We know that. So we provide this versatile software that allows you to have things your way.
- "Double" the number of buttons with the shift-button  
Are you a control freak? We are too. Enable the shift button functionality to turn all those buttons and hat switch functions into twice as many.
- Quickly switch between game controllers  
Fly your plane, drive your car, and then kick the ball around without being frustrated by controller configuration. Our software lets you easily manage and switch between your Logitech game controllers.
- Includes profiles for hundreds of popular PC games  
We're quite sure that you know exactly how you want to set up your controller for your favorite games. But just in case, we've thrown in a few hundred of our favorite configurations.
- Easily download new game profiles  
As if the profiles we ship with the controller weren't enough.
- Print out profiles for quick reference  
We hate losing buttons. So we like to print out our game configurations for quick reference.
